

Creation Manifesto

Brazilian Student Society for Aerospace R&D

22 April 2020

Free (Libre) and Open Source philosophy are better for developing great software, overall improve the community, and bring new ideas to the table.

This is extendable to the belief that freedom in information and research is the best and righteous way to make science.

The development of the aerospace field leads to a better understanding of the universe and improves society with the outcome technology.

“Show me the code, show me the data.”
